 268 pages.

Todd Landman*
 University of Nottingham

The first part of the book is devoted to a general introduction to the theory of
 differential equations. The author starts with the linear case and then moves to
 the nonlinear case. The second part is devoted to the theory of integral
 equations. The author starts with the linear case and then moves to the
 nonlinear case. The third part is devoted to the theory of partial
 differential equations. The author starts with the linear case and then moves to
 the nonlinear case. The fourth part is devoted to the theory of
 differential equations with delay. The author starts with the linear case and
 then moves to the nonlinear case. The fifth part is devoted to the theory of
 differential equations with stochastic perturbations. The author starts with the
 linear case and then moves to the nonlinear case. The sixth part is devoted to
 the theory of differential equations with boundary conditions. The author starts
 with the linear case and then moves to the nonlinear case. The seventh part
 is devoted to the theory of differential equations with initial conditions. The
 author starts with the linear case and then moves to the nonlinear case. The
 eighth part is devoted to the theory of differential equations with
 boundary and initial conditions. The author starts with the linear case and
 then moves to the nonlinear case. The ninth part is devoted to the theory of
 differential equations with boundary and initial conditions. The author starts
 with the linear case and then moves to the nonlinear case. The tenth part is
 devoted to the theory of differential equations with boundary and initial
 conditions. The author starts with the linear case and then moves to the
 nonlinear case.

1.0. The author is grateful to the Ministry of Education and Science of the
 Russian Federation for the support of this work.

pology and social work, and for those who generally seek greater resources in participant-observer methodologies and community based advocacy.

Katharine G. Young*

Professor, Boston College Law School

* Katharine G. Young is Professor of Law at Boston College Law School. She is the author of *Constituting Economic and Social Rights* (Oxford University Press, 2012), and the edited collections, *The Public Law of Gender* (Cambridge University Press, 2016, with Kim Rubenstein), and *The Future of Economic and Social Rights* (Cambridge University Press, 2019). She completed her SJD at Harvard Law School, where she was a Fellow at Harvard University's Project on Justice, Welfare and Economics and her B.A./LL.B. (Hons) at the University of Melbourne. She is currently editing, with Malcolm Langford, *The Oxford Handbook of Economic and Social Rights*.
